

Security risk management

Cyber security for peace of mind

Hawki

“Reassuring to know that our new systems are more robust to give us a peace of mind.”

Bonded warehouse owner, UK

Cyber security

For peace of mind

Much of our work overlaps with cyber security issues. This is a highly specialised area which requires technical knowledge, equipment and expertise. We work with a trusted partner for cyber security.

Key areas are:

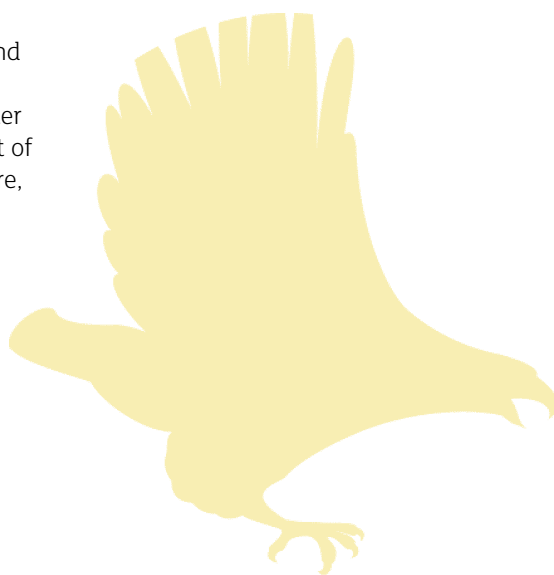

- Cyber penetration testing
- IT systems, servers and networks
- Data storage
- Work stations, anti-virus, firewalls, malware, phishing
- Administration, users, emails, access, domains, etc
- Online, services and payments, including PDQs and PCI DSS compliance
- Mobile devices, desktops and laptops

What is cyber security?

Computer security, cyber security and information technology security (IT security) is the protection of computer systems and networks from the theft of or damage to their hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide.

Why is it so important?

The field is becoming more important due to increased reliance on computer systems, the Internet and wireless network standards such as Bluetooth and Wi-Fi, and due to the growth of “smart” devices, including smartphones, televisions, and the various devices that constitute the “Internet of things”. Owing to its complexity, both in terms of politics and technology, cybersecurity is also one of the major challenges in the contemporary world.

COMPANY PROFILE

Hawki is a team of specialists dedicated to preventing and reducing security risks for our clients. Our main areas of business are:

- Asset protection
- Personnel protection
- Training
- Investigations
- Cyber security

Our clients range from private individuals to multinational corporations, governments, the public sector and supranational organisations. Our highly experienced teams operate globally in remote, medium, high risk and post-conflict areas. We analyse clients’ needs in depth and create bespoke packages, from a simple travel plan to complex security solutions.

Wherever you are, you can trust us. While we protect your assets and personnel, you can concentrate on your core business.

Call us today to discuss your security needs with one of our experts
